

Greetings!

It's that time of year again when Team Rocket is asking for your help. Once again, our team (consisting of 4 families from North Attleboro who have children with Type 1 diabetes: Danny Lang, Steve Sellner, Kelsey Mortimore and Brad Alix) will be participating in this year's Walk to Cure Diabetes which will be held on Sunday, October 18.

We are sincerely hoping to make this year's fundraising a huge success. It is with mixed emotions and heavy hearts, that we have decided that this will be our last year walking as a team. Three of the children will be going away to college next year and will hopefully take it upon themselves to continue with this great cause at their respective schools.

While we want to thank you in advance for this year's donation, we especially want to thank you for your tremendous support over the last 10 years (yes, 10!!). Whether you raised money and walked with us, made a donation or attended one of the many events we held throughout the years, we will never be able to express our gratitude.

We have tremendous friends and family and an especially supportive community in North Attleboro! Because of you, Team Rocket was inducted into the Rhode Island JDRF Hall of Fame in 2008 having raised over \$250,000!!!

It took a lot of hard work, a lot of missteps, a lot of tears and a lot of laughs...we will miss all of this. But we know it is time for our children to move on.

So, let's go out with a BANG!! Please consider raising money and walking with us. You can register online under Team Rocket if you would like to walk. It truly is a great morning. Or you can show your support by making a donation on my page or mailing to:
52 Edmund H Nichols Rd North Attleboro, MA 02760.

Won't you please give to JDRF as generously as you're able?

Together, we can make the cure a reality. Together we will be known as the people who cured diabetes.

Thank you,

Team Rocket
Lang, Sellner, Mortimore and Alix Families
